

New Steel Medical Cylinders

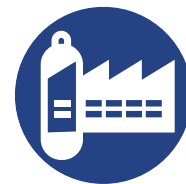

We exist to drive progress. Our products are a result of this. We share each new innovation with you, our customer, so you have more gas-packaging possibilities within reach.

**Win the
Weight-Loss
Challenge...**

...and tip the scales in your favor!

Worthington challenges the conventional wisdom in everything we do. This time we're focusing on medical cylinders, and now offer steel solutions just as light and clean as aluminum – sometimes even lighter and cleaner. In addition they cost less, last longer and are easier to maintain.

gases**

weight

Features that tip the scales

Lightweight

- Our 10 L 200 BAR weights is 14 % lighter than its aluminum counterpart - 8.6 KG vs. 10 KG
- Our 5 L 300 BAR cylinder comes in at the same weight as aluminum

Long-lasting

- Up to 3x stronger than aluminum
- Offers greater impact resistance
- Superior external finish extends the service life, dropping the total cost of ownership

Easy maintenance

- Steel threading is stronger and lasts longer than aluminum
- Makes changing valves easier than with aluminum cylinders

Internal Cleanliness

- Cylinder interior is compatible with medical gases
- High cleanliness standards ensure purity in healthcare environments
- ISO 15001 certified
